## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 7, 9 and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Dinardo. In regard to claim 1, Dinardo discloses an applicator comprised of a resilient bottle 20 having an opening wherein the bottle returns to its original form after being squeezed, a pin 12, 14 which partially surrounds the bottle and having first and second openings (the second opening being at 18) wherein the bottle opening is concentric to the pin second opening, a cap 13 having first and second open ends wherein the cap first open end is "united" with the pin first opening and the cap second open end is concentric to the pin second opening and an applicator holder 10. It is noted that the statements of intended use, i.e., "adapted to hold a liquid" does not impart any patentable structure to the claims. Further, the Dinardo device is capable of dispensing a liquid should a user so decide to employ the device. In regard to claims 2 and 3, a brush applicator 30 is attached to the applicator holder such that the applicator is positioned adjacent the cap first open end. In regard to claim 4, the bottle includes a neck between the bottle opening and the hollow body of the bottle. In regard to claim 7, the pin defines an annular wall 12 that divides the openings and has a first end that is united with a pin shoulder 14 wherein the pin second opening 18 is concentric with the

first opening. In regard to claim 9, a "plug" is 22, 29 is "associated" with the pin second opening. In regard to claim 10, the plug has an outer diameter which is smaller than the diameter of the cap second open end.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dinardo. Although the Dinardo reference does not disclose that the pin is made from plastic, it is the Examiner's position that it would have been obvious to one of ordinary skill in the art at the time the invention was made that the pin can be made from any suitable material, including the claimed material, without effecting the overall operation of the device.

***Allowable Subject Matter***

Claims 5, 8, 11 and 12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 13-17 are allowed.
